IASP 33rd World Congress
10-13 June 2025
Vienna, Austria

Welcome Willkommen

Welcome to the IASP 33rd World Congress in Vienna, Austria. In 2025, we are proud to celebrate a momentous milestone as we return to Austria for our 65th anniversary.

To ensure our conversations are conducted with the utmost care and respect, we encourage you to view the language guidance videos on safe language practices. This resource has been designed in collaboration with StandBy_Support After Suicide to help us navigate the topic of suicide with empathy and responsibility, fostering a supportive environment for all attendees.

Meet Papageno – a figurine inspired by Mozart’s The Magic Flute and a symbol of hope in suicide prevention. As the mascot of the IASP 33rd World Congress, he represents the Papageno Effect, which highlights the role of responsible communication in suicide prevention and offers hope to individuals in crisis. If you spot him, snap a photo and share it with #FindPapageno to spread hope and resilience.

With such complex and important discussions taking place over the next few days, we encourage you to take time out for your own wellbeing. A dedicated wellness room is available for all delegates – a quiet space to pause, reflect, or simply rest. If you’d like to talk, the team from Mental Health First Aid International is on hand and available in person to support you throughout the congress. The wellness room is located upstairs in Business Suite 2.

Welcome from IASP President, Professor Jo Robinson

It is my great pleasure to welcome you to the 33rd IASP World Congress in the beautiful and historic city of Vienna. As we celebrate IASP's 65th anniversary, we take the opportunity to reflect on how far we have come since IASP's founding in 1960, of the global community that has grown around a shared commitment: to reduce suicide and its impact worldwide, through research, advocacy, collaboration, and compassion. The 33rd World Congress offers a dynamic and inspiring programme that reflects the diversity, innovation, and strength of our field. We are proud to create space for dialogue, learning, and meaningful connection across sectors, disciplines, and regions. This year's key themes speak to the complexity of suicide prevention—from youth and older adults to workplace settings, digital innovation, media engagement, and postvention. Importantly, we continue to elevate the voices of those with lived and living experience, whose perspectives are shaping more effective and compassionate responses to suicide around the world. I want to extend my heartfelt thanks to the Organising and Scientific Committees, our Congress Co-Chairs—Professor Thomas Niederkrotenthaler, Professor Chan Lai Fong and Associate Professor Mark Sinyor—as well as our partners and sponsors. Their dedication has made this Congress possible and ensured that it represents the very best of what IASP stands for.

Whether this is your first World Congress or one of many, I hope that your time in Vienna will be intellectually stimulating, professionally rewarding, and personally meaningful. I encourage you to take the opportunity to share, connect, and collaborate – because it is only together that we can continue to advance suicide prevention globally.

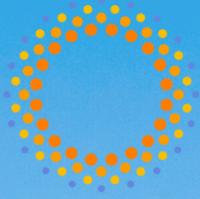

WITH THANKS

We extend our gratitude to our partners, sponsors and exhibitors whose generous support is instrumental in making the IASP 33rd World Congress a success.
