Applied Suicide Intervention Skills Training

ASIST is the world’s leading suicide intervention workshop. During the two-day interactive session, participants learn to intervene and help prevent the immediate risk of suicide.

In ASIST, people learn to apply a suicide intervention model. It helps caregivers recognise when someone may be at risk of suicide. It then explores how to connect with them in ways that understand and clarify that risk, increase their immediate safety and link them with further help.

Workshop features:
- Presentations and guidance from two LivingWorks registered trainers
- A scientifically proven intervention model
- Powerful audiovisual learning aids
- Group discussions
- Skills practice and development
- A balance of challenge and safety
